

LINZ Aquatic Pest Plant Control Programme 2010/11

Property owners, recreational and other users of the Rotorua Lakes, Lake Karapiro, Lake Dunstan, Lake Benmore and Lake Wanaka are advised that the application of diquat herbicide, in gel form, is to be carried out to control aquatic weeds in these lakes. Suction dredging and or hand weeding will also be used in Lakes Benmore, Dunstan and Wanaka as indicated.

Control works at Lake Karapiro have been completed for the 2010/11 season. The control works in the other Lakes will commence no earlier than 1 October 2010 and will continue intermittently, as weather permits, up to 30 June 2011. Control works will not take place at weekends, public holidays, or during the period from 20 December 2010 to 10 January 2011.
