 Your address* : 47 Soleares Avenue
 Your name*: Wendy Biggs
 Subject heading : Submission To: Maryburn Preliminary Proposal
 Body*:

The Preliminary Proposal needs to be withdrawn

This submission requests that the Preliminary Proposal for Maryburn be withdrawn as it fails to protect the extensive Maryburn outwash plain, the moraines between Lake Pukaki and Mary Range, the eastern slopes of Mary Range, Mary Burn Stream and wetlands, and the Northern wetland which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having outstanding significant inherent values (siv's) that warrant protection as public conservation land (or covenant) under the objects of the Crown Pastoral Lands Act, (CPLA).

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

Maryburn outwash plain - Conservation Area

The triangle of land between SH8 and Tekapo River warrants protection as Conservation land to protect the full range of significant species occurring on the nationally rare basin floor and its significant landscape.

The area proposed for a Sustainable Management Covenant (SMC) should be included as Public Conservation Land as it contains dryland species and systems that compliment the adjoining area.

Lake Pukaki and crest of Mary Range - including Pukaki lateral moraine - Conservation Area

This 1,293ha area of moraine warrants protection as public conservation land for its important values including the nationally significant terminal moraine site, threatened plants and remnant shrublands on low hill country, stony fans and terraces, kettle holes and turf communities Eastern Slopes Mary Range - Landscape Covenant

This area requires a landscape covenant to protect the outstanding landscapes as it is relatively unmodified with few structures and a significant feature when viewed from the SH8.

Mary Burn Stream and wetlands

This area requires protection as a conservation area as it is habitat for threatened long finned eel, koaro, black fronted tern black stilt, and banded dotterels.
 Northern wetland

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation.

These landscapes must be protected for the benefit of tourism and future generations of New Zealanders.

Wendy Biggs

Maryburn outwash plain - Conservation Area

The triangle of land between SH8 and Tekapo River warrants protection as Conservation land to protect the full range of significant species occurring on the nationally rare basin floor and its significant landscape.

The area proposed for a Sustainable Management Covenant (SMC) should be included as Public Conservation Land as it contains dryland species and systems that compliment the adjoining area.

Lake Pukaki and crest of Mary Range - including Pukaki lateral moraine - Conservation Area

This 1,293ha area of moraine warrants protection as public conservation land for its important values including the nationally significant terminal moraine site, threatened plants and remnant shrublands on low hill country, stony fans and terraces, kettle holes and turf communities Eastern Slopes Mary Range - Landscape Covenant

This area requires a landscape covenant to protect the outstanding landscapes as it is relatively unmodified with few structures and a significant feature when viewed from the SH8.

Mary Burn Stream and wetlands

This area requires protection as a conservation area as it is habitat for threatened long finned eel, koaro, black fronted tern black stilt, and banded dotterels.
Northern wetland

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation.

Further exploitative dairying in the Mackenzie Basin is completely wrong and is highly likely to result in further extinctions of already threatened birds, fish and other indigenous species of flora and fauna. This proposal must be stopped.

Yours sincerely,

Lisa Beardsley

 Subject heading : Submission To: Maryburn Preliminary Proposal
 Body*:

The Preliminary Proposal needs to be withdrawn

I regret that I lack the time needed to develop my own detailed submission, but wholeheartedly adopt the Forest and Bird submission that follows below as my own. I am a "middle of the road" New Zealander without any political axe to grind, nor any particular "Green" proclivities. However I hold very strongly to the view that the South Island High Country is of such ecological and geological importance (both nationally and internationally) that any parts of it that are currently in Crown ownership should remain in Crown ownership indefinitely and be protected from all forms of development. I urge those considering this proposal to take heed of Forest and Bird's position.

This submission requests that the Preliminary Proposal for Maryburn be withdrawn as it fails to protect the extensive Maryburn outwash plain, the moraines between Lake Pukaki and Mary Range, the eastern slopes of Mary Range, Mary Burn Stream and wetlands, and the Northern wetland which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having outstanding significant inherent values (siv's) that warrant protection as public conservation land (or covenant) under the objects of the Crown Pastoral Lands Act, (CPLA).

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

Maryburn outwash plain - Conservation Area

The triangle of land between SH8 and Tekapo River warrants protection as Conservation land to protect the full range of significant species occurring on the nationally rare basin floor and its significant landscape.

The area proposed for a Sustainable Management Covenant (SMC) should be included as Public Conservation Land as it contains dryland species and systems that compliment the adjoining area.

Lake Pukaki and crest of Mary Range - including Pukaki lateral moraine - Conservation Area

This 1,293ha area of moraine warrants protection as public conservation land for its important values including the nationally significant terminal moraine site, threatened plants and remnant shrublands on low hill country, stony fans and terraces, kettle holes and turf communities Eastern Slopes Mary Range - Landscape Covenant

This area requires a landscape covenant to protect the outstanding landscapes as it is relatively unmodified with few structures and a significant feature when viewed from the SH8.

Mary Burn Stream and wetlands

This area requires protection as a conservation area as it is habitat for threatened long finned eel, koaro, black fronted tern black stilt, and banded dotterels.
 Northern wetland

RELEASED UNDER THE OFFICIAL INFORMATION ACT

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation.

Kind regards,
Barney Cumberland

The Preliminary Proposal needs to be withdrawn

This submission requests that the Preliminary Proposal for Maryburn be withdrawn as it fails to protect the extensive Maryburn outwash plain, the moraines between Lake Pukaki and Mary Range, the eastern slopes of Mary Range, Mary Burn Stream and wetlands, and the Northern wetland which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having outstanding significant inherent values (siv's) that warrant protection as public conservation land (or covenant) under the objects of the Crown Pastoral Lands Act, (CPLA).

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

Maryburn outwash plain - Conservation Area

The triangle of land between SH8 and Tekapo River warrants protection as Conservation land to protect the full range of significant species occurring on the nationally rare basin floor and its significant landscape. Once this landscape is altered it will be lost forever. This cannot be allowed to happen.

The area proposed for a Sustainable Management Covenant (SMC) should be included as Public Conservation Land as it contains dryland species and systems that compliment the adjoining area.

Lake Pukaki and crest of Mary Range - including Pukaki lateral moraine - Conservation Area

This 1,293ha area of moraine warrants protection as public conservation land for its important values including the nationally significant terminal moraine site, threatened plants and remnant shrublands on low hill country, stony fans and terraces, kettle holes and turf communities Eastern Slopes Mary Range - Landscape Covenant

This area requires a landscape covenant to protect the outstanding landscapes as it is relatively unmodified with few structures and a significant feature when viewed from the SH8. This landscape makes NZ the unique destination it is for tourism and if turned into dairy farmland or grass land will not only use precious water resources but will NOT CONTINUE TO ATTRACT INTERNATIONAL VISITORS TO THE AREA.

Mary Burn Stream and wetlands

This area requires protection as a conservation area as it is habitat for threatened long finned eel, koaro, black fronted tern black stilt, and banded dotterels.
 Northern wetland

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation. Tourism income is vital to the MacKenzie region economy AND allows the natural environment to flourish. Turning this area into grazing pasture land would be a criminal act, in my opinion and a disaster for the future of New Zealand.

This landscape makes NZ the unique destination it is for tourism and if turned into dairy farmland or grass land will not only use precious water resources but will NOT CONTINUE TO ATTRACT INTERNATIONAL VISITORS TO THE AREA.

Mary Burn Stream and wetlands

This area requires protection as a conservation area as it is habitat for threatened long finned eel, koaro, black fronted tern black stilt, and banded dotterels.
 Northern wetland

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation. Tourism income is vital to the MacKenzie region economy AND allows the natural environment to flourish. Turning this area into grazing pasture land would be a criminal act, in my opinion and a disaster for the future of New Zealand.

 Subject heading : Submission To: Maryburn Preliminary Proposal
 Body*:

The Preliminary Proposal needs to be withdrawn

This submission requests that the Preliminary Proposal for Maryburn be withdrawn as it fails to protect the extensive Maryburn outwash plain, the moraines between Lake Pukaki and Mary Range, the eastern slopes of Mary Range, Mary Burn Stream and wetlands, and the Northern wetland which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having outstanding significant inherent values (siv's) that warrant protection as public conservation land (or covenant) under the objects of the Crown Pastoral Lands Act, (CPLA).

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

Maryburn outwash plain - Conservation Area

The triangle of land between SH8 and Tekapo River warrants protection as Conservation land to protect the full range of significant species occurring on the nationally rare basin floor and its significant landscape.

The area proposed for a Sustainable Management Covenant (SMC) should be included as Public Conservation Land as it contains dryland species and systems that compliment the adjoining area.

Lake Pukaki and crest of Mary Range - including Pukaki lateral moraine - Conservation Area

This 1,293ha area of moraine warrants protection as public conservation land for its important values including the nationally significant terminal moraine site, threatened plants and remnant shrublands on low hill country, stony fans and terraces, kettle holes and turf communities Eastern Slopes Mary Range - Landscape Covenant

This area requires a landscape covenant to protect the outstanding landscapes as it is relatively unmodified with few structures and a significant feature when viewed from the SH8.

Mary Burn Stream and wetlands

This area requires protection as a conservation area as it is habitat for threatened long finned eel, koaro, black fronted tern black stilt, and banded dotterels.
 Northern wetland

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation.

I am strongly opposed to any part of the McKenzie Basin becoming available for non-sustainable use,

Amanda Lees
