 Your name*: Tim Swale
 Subject heading : Submission To: Maryburn Preliminary Proposal
 Body*:

The Preliminary Proposal needs to be withdrawn

This submission requests that the Preliminary Proposal for Maryburn be withdrawn as it fails to protect the extensive Maryburn outwash plain, the moraines between Lake Pukaki and Mary Range, the eastern slopes of Mary Range, Mary Burn Stream and wetlands, and the Northern wetland which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having outstanding significant inherent values (siv's) that warrant protection as public conservation land (or covenant) under the objects of the Crown Pastoral Lands Act, (CPLA).

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

Maryburn outwash plain - Conservation Area

The triangle of land between SH8 and Tekapo River warrants protection as Conservation land to protect the full range of significant species occurring on the nationally rare basin floor and its significant landscape.

The area proposed for a Sustainable Management Covenant (SMC) should be included as Public Conservation Land as it contains dryland species and systems that compliment the adjoining area.

Lake Pukaki and crest of Mary Range - including Pukaki lateral moraine - Conservation Area

This 1,293ha area of moraine warrants protection as public conservation land for its important values including the nationally significant terminal moraine site, threatened plants and remnant shrublands on low hill country, stony fans and terraces, kettle holes and turf communities Eastern Slopes Mary Range - Landscape Covenant

This area requires a landscape covenant to protect the outstanding landscapes as it is relatively unmodified with few structures and a significant feature when viewed from the SH8.

Mary Burn Stream and wetlands

This area requires protection as a conservation area as it is habitat for threatened long finned eel, koaro, black fronted tern black stilt, and banded dotterels.
 Northern wetland

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation.

Every endeavour should be made to retain the wonderful natural landscape that we have in New Zealand. Our economy depends on it.

Yours faithfully
 Tim Swale

The Preliminary Proposal needs to be withdrawn

This submission requests that the Preliminary Proposal for Maryburn be withdrawn as it fails to protect the extensive Maryburn outwash plain, the moraines between Lake Pukaki and Mary Range, the eastern slopes of Mary Range, Mary Burn Stream and wetlands, and the Northern wetland which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having outstanding significant inherent values (siv's) that warrant protection as public conservation land (or covenant) under the objects of the Crown Pastoral Lands Act, (CPLA).

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

Maryburn outwash plain - Conservation Area

The triangle of land between SH8 and Tekapo River warrants protection as Conservation land to protect the full range of significant species occurring on the nationally rare basin floor and its significant landscape.

The area proposed for a Sustainable Management Covenant (SMC) should be included as Public Conservation Land as it contains dryland species and systems that compliment the adjoining area.

Lake Pukaki and crest of Mary Range - including Pukaki lateral moraine - Conservation Area

This 1,293ha area of moraine warrants protection as public conservation land for its important values including the nationally significant terminal moraine site, threatened plants and remnant shrublands on low hill country, stony fans and terraces, kettle holes and turf communities Eastern Slopes Mary Range - Landscape Covenant

This area requires a landscape covenant to protect the outstanding landscapes as it is relatively unmodified with few structures and a significant feature when viewed from the SH8.

Mary Burn Stream and wetlands

This area requires protection as a conservation area as it is habitat for threatened long finned eel, koaro, black fronted tern black stilt, and banded dotterels.
Northern wetland

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation.

I lived in NZ and visited this outstanding and significant area and am concerned that its biodiversity, will be harmed irreparably in the name of profit.

Regards

Laura Hirst

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

Maryburn outwash plain - Conservation Area

The triangle of land between SH8 and Tekapo River warrants protection as Conservation land to protect the full range of significant species occurring on the nationally rare basin floor and its significant landscape.

I once had a bach at Twizel and fell in love with the Mackenzie area. I feel very strongly that we MUST maintain the tussock land for future generations to enjoy as we have. I am horrified at a suggestion that irrigation for milk production may be allowed to destroy the tussocks. Especially this is selfish for this generation as the world demand for milk cannot last after cheap oil goes.

The area proposed for a Sustainable Management Covenant (SMC) should be included as Public Conservation Land as it contains dryland species and systems that compliment the adjoining area.

Lake Pukaki and crest of Mary Range - including Pukaki lateral moraine - Conservation Area

This 1,293ha area of moraine warrants protection as public conservation land for its important values including the nationally significant terminal moraine site, threatened plants and remnant shrublands on low hill country, stony fans and terraces, kettle holes and turf communities Eastern Slopes Mary Range - Landscape Covenant

This area requires a landscape covenant to protect the outstanding landscapes as it is relatively unmodified with few structures and a significant feature when viewed from the SH8.

Mary Burn Stream and wetlands

This area requires protection as a conservation area as it is habitat for threatened long finned eel, koaro, black fronted tern black stilt, and banded dotterels.
 Northern wetland

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation.

The area proposed for a Sustainable Management Covenant (SMC) should be included as Public Conservation Land as it contains dryland species and systems that compliment the adjoining area.

Lake Pukaki and crest of Mary Range - including Pukaki lateral moraine - Conservation Area

This 1,293ha area of moraine warrants protection as public conservation land for its important values including the nationally significant terminal moraine site, threatened plants and remnant shrublands on low hill country, stony fans and terraces, kettle holes and turf communities Eastern Slopes Mary Range - Landscape Covenant

This area requires a landscape covenant to protect the outstanding landscapes as it is relatively unmodified with few structures and a significant feature when viewed from the SH8.

Mary Burn Stream and wetlands

This area requires protection as a conservation area as it is habitat for threatened long finned eel, koaro, black fronted tern black stilt, and banded dotterels.
 Northern wetland

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation and accelerate the loss of New Zealand's unique but already declining biodiversity.

A collaborative process has been initiated under the Mackenzie Sustainable Futures Trust. To bypass this would be a breach of faith.

Yours sincerely

Graham Falla

As a person who is based in Timaru but spends many weeks a year in the Mackenzie country I believe the bird life, plants & especially the waterways must be protected against development for individual gain. When our waterways are polluted or badly degraded it will dearly cost our Government to correct. Water is the true gold. Tourism also is a healthy earner for our country. I support the statements listed below

The Preliminary Proposal needs to be withdrawn

This submission requests that the Preliminary Proposal for Maryburn be withdrawn as it fails to protect the extensive Maryburn outwash plain, the moraines between Lake Pukaki and Mary Range, the eastern slopes of Mary Range, Mary Burn Stream and wetlands, and the Northern wetland which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having outstanding significant inherent values (siv's) that warrant protection as public conservation land (or covenant) under the objects of the Crown Pastoral Lands Act, (CPLA).
