 Subject heading : Submission To: Maryburn Preliminary Proposal
 Body*:

The Preliminary Proposal needs to be withdrawn

This submission requests that the Preliminary Proposal for Maryburn be withdrawn as it fails to protect the extensive Maryburn outwash plain, the moraines between Lake Pukaki and Mary Range, the eastern slopes of Mary Range, Mary Burn Stream and wetlands, and the Northern wetland which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having outstanding significant inherent values (siv's) that warrant protection as public conservation land (or covenant) under the objects of the Crown Pastoral Lands Act, (CPLA).

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

Maryburn outwash plain - Conservation Area

The triangle of land between SH8 and Tekapo River warrants protection as Conservation land to protect the full range of significant species occurring on the nationally rare basin floor and its significant landscape.

The area proposed for a Sustainable Management Covenant (SMC) should be included as Public Conservation Land as it contains dryland species and systems that compliment the adjoining area.

Lake Pukaki and crest of Mary Range - including Pukaki lateral moraine - Conservation Area

This 1,293ha area of moraine warrants protection as public conservation land for its important values including the nationally significant terminal moraine site, threatened plants and remnant shrublands on low hill country, stony fans and terraces, kettle holes and turf communities Eastern Slopes Mary Range - Landscape Covenant

This area requires a landscape covenant to protect the outstanding landscapes as it is relatively unmodified with few structures and a significant feature when viewed from the SH8.

Mary Burn Stream and wetlands

This area requires protection as a conservation area as it is habitat for threatened long finned eel, koaro, black fronted tern black stilt, and banded dotterels.
 Northern wetland

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation.

The land round the Maryburn with its sweeping mountain landscapes is my very favourite landscape in New Zealand and must be protected for its biodiversity, glaciology, tourist and other intrinsic qualities

David Anderson

The Preliminary Proposal needs to be withdrawn.

New Zealand's key economic asset is the diversity of it's rare and unique landscapes.

This submission requests that the Preliminary Proposal for Maryburn be withdrawn.
 The Proposal does not sufficiently project

- the Maryburn outwash plain
- the moraines between Lake Pukaki and Mary Range,
- the eastern slopes of Mary Range,
- Mary Burn Stream and wetlands, or
- the Northern wetland

These features have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having outstanding significant inherent values (siv's) that warrant protection as public conservation land (or covenant) under the objects of the Crown Pastoral Lands Act, (CPLA).

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:
 Maryburn outwash plain - Conservation Area

The triangle of land between SH8 and Tekapo River warrants protection as Conservation land to protect the full range of significant species occurring on the nationally rare basin floor and its significant landscape.

The area proposed for a Sustainable Management Covenant (SMC) should be included as Public Conservation Land as it contains dryland species and systems that compliment the adjoining area.

Lake Pukaki and crest of Mary Range - including Pukaki lateral moraine - Conservation Area

 Northern wetland

This site of special wildlife interest for birds warrants protection by a covenant to ensure ecologically sustainable management. Ongoing grazing will result in continued degradation.

Public ownership provides the simplest way in which the necessary controls to protect these landscapes and habitats can be achieved at no cost to private interests.

I WORKED IN A PROFESSIONAL CAPACITY WITH IAN INNES AT HALDON STATION IN 1965 AND COMMENTED THAT COMMENTED THAT THE TRIAL AT THE PUKAKI PUB ON LUCERNE GROWTH MIGHT CHANGE THE FACE OF THE MCKENZIE - HIS RESPONSE WAS - NEVER. AT THE TIME I DIDN'T QUITE UNDERSTAND HIS RESISTANCE TO PROGRESS (AS I SAW IT) - NOW I DO! IT WAS ALL ABOUT THE NATURAL CHARACTER AND AESTHETIC (NOW TOURISM TOO) VALUES OF THE MCKENZIE.

IT STILL IS, AND THE PROBLEM WITH OUR PRESENT GOVERNANCE OF THE LAND (ALONG WITH OUR POLITICAL DECISION MAKING) IS THAT IT IS ALL TOO SHORT TERM. MCKENZIE AS WE KNOW IT FOREVER !!!!!

The Preliminary Proposal needs to be withdrawn

I oppose the culture under which Land Tenure Review has taken place - it is little more than privatisation of large tracts of public lands which contribute to the landscape of New Zealand and these landscapes are an integral part of the spirit and culture of New Zealanders.

If farming operations are to be continued, they should continue under the guardianship and control of the Crown in the form of leases. No land should be privatised.

Benjamin Franzmayr
