 Address *: 1811 Kaipara Coast Highway
 To: tony.sharpe@darroch.co.nz
 Subject Heading : Submission To: The Wolds Preliminary Proposal
 Body* :

This submission requests that the Preliminary Proposal for the Wolds be withdrawn as it fails to protect the extensive outwash plains, the Maryburn wetland catchment, the Tekapo River terraces and slopes of Mary Range, Paterson Ponds and the outwash terraces on the unoccupied Crown Land which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having significant values that warrant protection as public conservation land under the objects of the Crown Pastoral Lands Act, (CPLA).

The proposal for the Wolds is short sighted and short term.

The proposal also fails to provide secure public access to enable the public to enjoy the prominent Mackenzie Basin landmark, Mt Mary from SH8.

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

All of the Maryburn Wetland catchment and Maryburn Stream - Extension to Proposed Scientific Reserve This area has outstanding values associated with wetlands, and streams, shrubby moraines and short tussock grasslands. It contains habitat for threatened species. To fulfil the objects of the CPLA this area needs to be protected as public conservation land as an extension to the proposed Scientific Reserve.

Western slopes Mary Range overlooking Lake Pukaki - Public Conservation Land

- This area contains outstanding landscapes, nationally rare wetland ecosystems and important dry land vegetation and shrublands, remnants of pre human vegetation. To fulfil the objects of the CPLA this area needs to be protected as public conservation land.
- To ensure secure public access and public enjoyment I ask that there be public access to Mt Mary from SH 8 as well as seek access along the track from the Pukaki Canal over the existing farm track that lies on The Wolds. It is a key recreation route and has panoramic views overlooking Lake Pukaki.
- Seek funding to support DOC in controlling the wilding pines that the lessee has abandoned.

Southeast Face Mary Range - Landscape Covenant

This area has relatively unmodified landscapes with remnant short tussock grasslands and shrublands that are highly visible from a major tourist route. A Reserves Act Landscape Covenant is needed to protect the landscapes associated with remaining indigenous vegetation, the uncluttered open landscape and extensive views.

Tekapo River Terraces - Extension to Proposed CA 1 The proposed CA1 needs to be extended to protect all of the special values , including habitats for threatened plants, lizards and birds.

Outwash Plain east of Mary Range and SH8 and NE Triangle Unoccupied Crown Land - Conservation Area These areas contain important landscape and conservation values associated with threatened environments, habitats and species and relatively natural open, highly visible landscapes adjoining a major road and tourist route.

Regards

Jenny Laycock.

I have brought Americans to NZ since 1995 to see birds and NZ's beautiful and varied landscapes. One area that always draws excited and favorable comment is the MacKenzie Basin, due to its unexpected uniqueness in NZ. I submit that the correct procedure to follow is that suggested by Forest and Bird: an agreement on a permanent vision for the Mackenzie Basin that would provide a framework for future tenure reviews.

Ross Silcock,

My submission requests that the Preliminary Proposal for the Wolds be withdrawn as it fails to protect the extensive outwash plains, the Maryburn wetland catchment, the Tekapo River terraces and slopes of Mary Range, Paterson Ponds and the outwash terraces on the unoccupied Crown Land which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having significant values that warrant protection as public conservation land under the objects of the Crown Pastoral Lands Act, (CPLA). Too often scant regard is paid to the outstanding natural beauty, rare landscapes and threatened indigenous biodiversity in the search for the big buck.

The proposal fails to provide secure public access to enable the public to enjoy the prominent Mackenzie Basin landmark, Mt Mary from State Highway 8. If I am not mistaken there is also significant 'black sky' in this area i.e. no light pollution and an opportunity to see the magnificent stars

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

All of the Maryburn Wetland catchment and Maryburn Stream - Extension to Proposed Scientific Reserve This area has outstanding values associated with wetlands, and streams, shrubby moraines and short tussock grasslands. It contains habitat for threatened species. To fulfil the objects of the CPLA this area needs to be protected as public conservation land as an extension to the proposed Scientific Reserve.

Western slopes Mary Range overlooking Lake Pukaki - Public Conservation Land

- This area contains outstanding landscapes, nationally rare wetland ecosystems and important dry land vegetation and shrublands, remnants of pre human vegetation. To fulfil the objects of the CPLA this area needs to be protected as public conservation land.

Hands off our Big Sky Country- of course there are values that exceed it's economic or productive values- but as a country we seem to be forgetting those other values, of wild space, wilderness, natural beauty, openness and until we take a stand to ensure

these places remain intact and pristine in their natural beauty we will be depriving future generations of the experience our our 'wilds'. We do not need more agri business producing milk and meat in the mackenzie country and stealing water from our river systems, while most NZer's are struggling to pay for a litre of milk at the supermarket!

The Preliminary Proposal needs to be withdrawn

I oppose the culture under which Land Tenure Review has taken place - it is little more than privatisation of large tracts of public lands which contribute to the landscape of New Zealand and these landscapes are an integral part of the spirit and culture of New Zealanders.

If farming operations are to be continued, they should continue under the guardianship and control of the Crown in the form of leases. No land should be privatised.

- To ensure secure public access and public enjoyment I ask that there be public access to Mt Mary from SH 8 as well as seek access along the track from the Pukaki Canal over the existing farm track that lies on The Wolds. It is a key recreation route and has panoramic views overlooking Lake Pukaki.
- Seek funding to support DOC in controlling the wilding pines that the lessee has abandoned.

Southeast Face Mary Range - Landscape Covenant

This area has relatively unmodified landscapes with remnant short tussock grasslands and shrublands that are highly visible from a major tourist route. A Reserves Act Landscape Covenant is needed to protect the landscapes associated with remaining indigenous vegetation, the uncluttered open landscape and extensive views.

Tekapo River Terraces - Extension to Proposed CA 1 The proposed CA1 needs to be extended to protect all of the special values , including habitats for threatened plans, lizards and birds.

Outwash Plain east of Mary Range and SH8 and NE Triangle Unoccupied Crown Land - Conservation Area These areas contain important landscape and conservation values associated with threatened environments, habitats and species and relatively natural open, highly visible landscapes adjoining a major road and tourist route..

 Your email : frostrs@farmside.co.nz
 Your name* : Roger Frost
 Address *: Box 148, Murchison, 7049
 To: tony.sharpe@darroch.co.nz
 Subject Heading : Submission To: The Wolds Preliminary Proposal
 Body* :

This submission requests that the Preliminary Proposal for the Wolds be withdrawn as it fails to protect the extensive outwash plains, the Maryburn wetland catchment, the Tekapo River terraces and slopes of Mary Range, Paterson Ponds and the outwash terraces on the unoccupied Crown Land which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having significant values that warrant protection as public conservation land under the objects of the Crown Pastoral Lands Act, (CPLA).

The proposal also fails to provide secure public access to enable the public to enjoy the prominent Mackenzie Basin landmark, Mt Mary from SH8.

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

All of the Maryburn Wetland catchment and Maryburn Stream - Extension to Proposed Scientific Reserve This area has outstanding values associated with wetlands, and streams, shrubby moraines and short tussock grasslands. It contains habitat for threatened species. To fulfil the objects of the CPLA this area needs to be protected as public conservation land as an extension to the proposed Scientific Reserve.

Western slopes Mary Range overlooking Lake Pukaki - Public Conservation Land

- This area contains outstanding landscapes, nationally rare wetland ecosystems and important dry land vegetation and shrublands, remnants of pre human vegetation. To fulfil the objects of the CPLA this area needs to be protected as public conservation land.
- To ensure secure public access and public enjoyment I ask that there be public access to Mt Mary from SH 8 as well as seek access along the track from the Pukaki Canal over the existing farm track that lies on The Wolds. It is a key recreation route and has panoramic views overlooking Lake Pukaki.
- Seek funding to support DOC in controlling the wilding pines that the lessee has abandoned.

Southeast Face Mary Range - Landscape Covenant

This area has relatively unmodified landscapes with remnant short tussock grasslands and shrublands that are highly visible from a major tourist route. A Reserves Act Landscape Covenant is needed to protect the landscapes associated with remaining indigenous vegetation, the uncluttered open landscape and extensive views.

Tekapo River Terraces - Extension to Proposed CA 1 The proposed CA1 needs to be extended to protect all of the special values , including habitats for threatened plants, lizards and birds.

Outwash Plain east of Mary Range and SH8 and NE Triangle Unoccupied Crown Land - Conservation Area These areas contain important landscape and conservation values associated with threatened environments, habitats and species and relatively natural open, highly visible landscapes adjoining a major road and tourist route.

These values are best protected by retaining them in Crown ownership so that implementing the necessary controls impacts only on the Crown and is thus far more easily achieved.

I've read through the following submission prepared by Forest and Bird and it reflects what I feel about this issue so clearly that I can't add very much. However, I would say that I believe that we should be retaining in local and public possessions those assets we have. Keep Aotearo New Zealand in our hands.

This submission requests that the Preliminary Proposal for the Wolds be withdrawn as it fails to protect the extensive outwash plains, the Maryburn wetland catchment, the Tekapo River terraces and slopes of Mary Range, Paterson Ponds and the outwash terraces on the unoccupied Crown Land which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having significant values that warrant protection as public conservation land under the objects of the Crown Pastoral Lands Act, (CPLA).

I am particularly concerned with this proposal because:

It fails to protect the outwash plains, which are extensive.
It fails to protect the Tekapo River's terrace system.
It would cause great deterioration of the slopes of the Mary's Range.

I spend part of most years in New Zealand and part in California. The main reason I come back again and again is the wonderful scenic beauty of the area. Once it's "developed" it can never again be the gorgeous wild land that it is now.

Thank you

Roena Oesting.

I am lucky enough to live in Timaru but own a small fishing cottage in the Mackenzie Country. I love and deeply value this golden environment. I know this area and we use the Tekapo river area as a recreational area. This area has rare plants & a fragile ecosystem that cannot stand intensive farming.

I endorse the comments listed below.

This submission requests that the Preliminary Proposal for the Wolds be withdrawn as it fails to protect the extensive outwash plains, the Maryburn wetland catchment, the Tekapo River terraces and slopes of Mary Range, Paterson Ponds and the outwash terraces on the unoccupied Crown Land which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having significant values that warrant protection as public conservation land under the objects of the Crown Pastoral Lands Act, (CPLA).

This submission requests that the Preliminary Proposal for the Wolds be withdrawn as it fails to protect the extensive outwash plains, the Maryburn wetland catchment, the Tekapo River terraces and slopes of Mary Range, Paterson Ponds and the outwash terraces on the unoccupied Crown Land which have been identified by expert botanists, entomologists, ecologists and Department of Conservation Staff as having significant values that warrant protection as public conservation land under the objects of the Crown Pastoral Lands Act, (CPLA).

The proposal also fails to provide secure public access to enable the public to enjoy the prominent Mackenzie Basin landmark, Mt Mary from SH8.

The specific aspects of the proposed preliminary proposal that do not meet the objects of the Crown Pastoral Lands Act include:

All of the Maryburn Wetland catchment and Maryburn Stream - Extension to Proposed Scientific Reserve This area has outstanding values associated with wetlands, and streams, shrubby moraines and short tussock grasslands. It contains habitat for threatened species. To fulfil the objects of the CPLA this area needs to be protected as public conservation land as an extension to the proposed Scientific Reserve.

Western slopes Mary Range overlooking Lake Pukaki - Public Conservation Land

- This area contains outstanding landscapes, nationally rare wetland ecosystems and important dry land vegetation and shrublands, remnants of pre human vegetation. To fulfil the objects of the CPLA this area needs to be protected as public conservation land.
- To ensure secure public access and public enjoyment I ask that there be public access to Mt Mary from SH 8 as well as seek access along the track from the Pukaki Canal over the existing farm track that lies on The Wolds. It is a key recreation route and has panoramic views overlooking Lake Pukaki.
- Seek funding to support DOC in controlling the wilding pines that the lessee has abandoned.

Southeast Face Mary Range - Landscape Covenant

This area has relatively unmodified landscapes with remnant short tussock grasslands and shrublands that are highly visible from a major tourist route. A Reserves Act Landscape Covenant is needed to protect the landscapes associated with remaining indigenous vegetation, the uncluttered open landscape and extensive views.

Tekapo River Terraces - Extension to Proposed CA 1 The proposed CA1 needs to be extended to protect all of the special values, including habitats for threatened plants, lizards and birds.

Outwash Plain east of Mary Range and SH8 and NE Triangle Unoccupied Crown Land - Conservation Area These areas contain important landscape and conservation values associated with threatened environments, habitats and species and relatively natural open, highly visible landscapes adjoining a major road and tourist route.

Meanwhile the outcome of collaboration through the Mackenzie Sustainable Futures Trust would be pre-empted.

I am forwarding above a Forest and Bird submission in regard to this further loss of publicly owned land in the South Island. I see no environmental or economic purpose in this wholesale privatisation of presently publicly owned leasehold land. Much of the

economic benefit of these sales seems to go to the purchasers, and very little to the public. The programme of leasehold sales has mostly been unsatisfactory, and has gained little to the exchequer, and lost a great deal of high amenity value land to private interests at knockdown prices, to the detriment of natural vistas and open spaces. . It is sad to see that so little has been learnt from previous sales and this process seems to be continuing unabated.

John Monro.

This submission requests that the Preliminary Proposal for the Wolds be withdrawn. It seems folly at the very least to advance any tenure reviews within the Makenzie Basin at this time due to the extreme public concerns centering on the future of the basin.

The Crown has the same rights as leasees in seeking to withdraw from a review when circumstance warrant. Whilst this may erk participants when either party seeks to withdraw it is a mechanisim never the less available for the right reasons.

In this instance I believe it is paramount for the Crown to exercise its prerogative to withdraw, Given the extent and scale landscape of the basin to anticipate changes in a ad hoc fashion, such as that presented by individual property reviews, is at variance to the preservation the uniformity that is the overriding experience the imprints on visitors and residence alike.

I believe that this is the last opportunity to preserve the understood natural character of the basin.

It would I believe be a travisty if the opportunity for full public debate on the future of the basin was to significantly reduced, as it would be if any tenure reviews are progressed to finality.

As a general response I feel that the review itself fails to protect numerous features the subject of several scientific and agency reports carried out over a number of years, These reports are listed on the LINZ website. They cover aspects such as landscape protection, habitats of rare or threatened species and provision of appropriate levels of public access.

Western slopes Mary Range overlooking Lake Pukaki - Public Conservation Land

- This area contains outstanding landscapes, nationally rare wetland ecosystems and important dry land vegetation and shrublands, remnants of pre human vegetation. To fulfil the objects of the CPLA this area needs to be protected as public conservation land.
- To ensure secure public access and public enjoyment I ask that there be public access to Mt Mary from SH 8 as well as seek access along the track from the Pukaki Canal over the existing farm track that lies on The Wolds. It is a key recreation route and has panoramic views overlooking Lake Pukaki.
- Seek funding to support DOC in controlling the wilding pines that the lessee has abandoned.

Southeast Face Mary Range - Landscape Covenant

This area has relatively unmodified landscapes with remnant short tussock grasslands and shrublands that are highly visible from a major tourist route. A Reserves Act Landscape Covenant is needed to protect the landscapes associated with remaining indigenous vegetation, the uncluttered open landscape and extensive views.

Tekapo River Terraces - Extension to Proposed CA 1 The proposed CA1 needs to be extended to protect all of the special values , including habitats for threatened plants, lizards and birds.

Outwash Plain east of Mary Range and SH8 and NE Triangle Unoccupied Crown Land - Conservation Area These areas contain important landscape and conservation values associated with threatened environments, habitats and species and relatively natural open, highly visible landscapes adjoining a major road and tourist route..

Personal comment, irrigating naturally dry areas always results in salification and eventual destruction of the soil structure and collapse of the agribusiness

imposed . Ref. Australia is losing land to salification at an amazing rate. For commonsense reasons , remember the Soviet irrigation of the so called Cotton lands of Caspian/Aral seas... Agribusiness has no foresight , no science except todays money.
B &M Crutchley .
