Schedule One: Provisions relating to the Schedule One Land

Not applicable.

Schedule Two: Provisions relating to the Schedule Two Land

1 Details of designation

- 1.1 Under this Proposal the land shown outlined in pink on the Plan, being 6505 hectares (approximately) is designated as land to be restored to or retained in Crown control as conservation area subject to :
- a. the granting of the concession easement shown as dashed green and labelled Y – Z on the Plan and substantially as set out in Appendix 4 as Concession Easement One;
 - b. the granting of the concession easement shown as dashed blue and labelled c-d-e on the Plan and substantially as set out in Appendix 5 as Concession Easement Two;
 - c. the granting of the concession easement shown as dashed blue and labelled f-d on the Plan and substantially as set out in Appendix 6 as Concession Easement Three;

2 Information Concerning Proposed Concessions over the Conservation Area:

2.1 Concession Easement One (Y-Z):**2.1.1 Description of proposed activity:**

Easement of right of way for motor vehicles, machinery and implements and to convey water together with incidental rights.

2.1.2 Description of area where proposed activity to be carried out and proposed status:

The easement follows a 4wd access track along the north riverbank of Bushy Creek, extending upstream for approximately 800 metres to an intake. The easement includes the intake, pipeline, storage tanks and the 4wd access track. The proposed status of the land is conservation area. From the storage tanks, water is then reticulated outside of the proposed conservation area for stock use on the adjoining paddocks, which are a mixture of existing freehold and proposed freehold.

2.1.3 Description of potential effects of proposed activity and any actions proposed to avoid, mitigate or remedy any adverse effect:

Provided that the design and maintenance of the intake and the amount of water taken remains unchanged and there is no contamination of the watercourse or bank disturbance, there are unlikely to be any detrimental effects on the significant inherent aquatic values of Bushy Creek. DOC may, if necessary, require minor modifications to the intake screen to prevent juvenile galaxiids from being trapped. The pipeline, access track and storage tanks are sited on land cleared of original vegetation for this purpose and thus has lesser significant inherent value. Some periodic clearance of vegetation

regrowth may be required .If done relatively frequently, there will not be any adverse effects. Any major works required will need to be done under DOC supervision. DOC staff will be inspecting the area on a regular basis. The use of the water resource, subject to controls, is seen by DOC as being acceptable.

2.1.4 Details of the proposed type of concession:

Concession under Section 17Q Conservation Act 1987.

2.1.5 Proposed duration of concession:

60 years.

2.1.6 Reasons for proposed duration:

The concession duration is long term to provide guaranteed access to a supply of stock water to the adjoining land.

2.1.7 Proposed grantee:

Lake Wakatipu Station Ltd

2.1.8 Relevant information about the proposed grantee including information relevant to the grantee's ability to carry out the proposed activity:

The proposed concessionaires have installed and operated the water supply scheme in a manner, which has not significantly affected the inherent values present. DOC currently has a good working relationship with them over a variety of issues including fire control, control of goats and wilding pines.

2.2 Concession Easement Two (c-d-e):

2.2.1 Description of proposed activity:

The easement concession will provide for the movement of stock between Greenvale and Halfway Bay Station, on foot, horses, with or without the use of farm dogs, and a 2ha holding paddock.

2.2.2 Description of area where proposed activity to be carried out and proposed status:

The proposed concession easement is to provide for stock movement between Greenvale and Halfway Bay Station and includes a 2ha holding paddock over proposed conservation area. The holding paddock is located at the current upper fence in the valley opposite the northwest corner of the Glen Allen Reserve and running down to Roberts Creek

2.2.3 Description of potential effects of proposed activity and any actions proposed to avoid, mitigate or remedy any adverse effect:

The driving of stock along the easement may lead to some minor grazing of native vegetation, however it is considered that the easement terms contain sufficient controls to avoid, mitigate or remedy any such adverse effects. The easement contains clauses dealing with the protection of the environment, interference with natural features, storage of noxious substances and the obstruction of the public enjoyment of the area. The holding paddock will be located on dry rocky ground where possible to minimize pugging.

DOC staff will periodically visit both the easement area and holding paddock of proposed conservation land for a range of activities including surveillance and control of wild animals and weeds and will therefore be aware if the concession activity is having any negative effects.

2.2.4 Details of the proposed type of concession:

The proposed concession easement will be under Section 17Q Conservation Act 1987.

2.2.5 Proposed duration of concession:

Proposed duration- The easement shall be forever appurtenant to the land of the transferee to which it provides access. A perpetual term is therefore required;

2.2.6 Reasons for proposed duration:

The access route for stock movement being granted, provides access for stock movement from Greenvale to Halfway Bay Station, also owned by the Holder. It provides an alternative for Halfway Bay Station to barging stock out and also to take stock into Halfway Bay, including stock that may have been purchased from Greenvale Station.

2.2.7 Proposed grantee:

Lake Wakatipu Station Ltd

2.2.8 Relevant information about the proposed grantee including information relevant to the grantee's ability to carry out the proposed activity:

The proposed concessionaire currently uses this access route for movement of stock, with no negative effects associated with this use being noted. Movement of stock is limited to an estimated maximum of 1500 sheep and up to 150 cattle, twice a year in late summer and early autumn. Stock are to be held overnight in the holding paddock as the duration of the stock movement will take two days.
