2 Conditions

- 2.1 This Proposal, and any agreement arising therefrom, is subject to the conditions contained in Schedule Four (if any).

3 Settlement

- 3.1 Unless otherwise agreed by the parties, the Settlement Date for the disposal of the Freehold Land to the Holder by freehold disposal will be the day that is TEN (10) working days following the day on which Land Information New Zealand notifies the Commissioner that the Final Plan and a copy of this Proposal are registered in accordance with the Act.

- 3.2 The Freehold Land will be disposed of to the Holder under the Land Act 1948.

- 3.3 Notwithstanding anything to the contrary, if, as at the Settlement Date (as determined pursuant to clause 3.1), the rent payable under the Lease is subject to a Rent Review, then the Commissioner may elect to:

(a) settle on the Settlement Date on the basis that the Commissioner may retain from the Commissioner's Payment an amount which the Commissioner, acting reasonably, estimates will be payable by the Holder to the Commissioner following agreement or determination of the Rent Review ("the Retention"). The Retention shall be held by the Crown Law Office in an on-call, interest-bearing trust account in the joint names of the parties for their respective rights and interests. Upon agreement or determination of the Rent Review, the Commissioner shall calculate the rent shortfall payable by the Holder to the Commissioner in respect of the period from the effective date of the Rent Review to the Settlement Date, both dates inclusive ("the Shortfall"). If:

(i) the Shortfall is less than the Retention and the net interest earned thereon, the balance shall be paid by the Commissioner to the Holder within TEN (10) working days; or

(ii) the Shortfall is more than the Retention and the net interest earned thereon, the balance shall be paid by the Holder to the Commissioner within TEN (10) working days;

4 Holder's Payment

- 4.1 By 3.00 p.m. on the Settlement Date, the Holder must pay the Holder's Payment and all other money payable to the Commissioner or the duly appointed agent of the Commissioner by bank cheque without set-off or deduction of any kind in accordance with the settlement requirements of the Commissioner.

- 4.2 If the Holder fails to pay the Holder's Payment or any part of it or any other money to the Commissioner or to the duly appointed agent of the Commissioner on the Settlement Date clause 19 will apply.

5 Commissioner's Payment

- 5.1 The Commissioner shall pay the Commissioner's Payment to the Holder on the Settlement Date.
- 5.2 No interest shall be payable to the Holder by the Commissioner in respect of the Commissioner's Payment, including (without limitation) for the period from the Vesting Date to the Settlement Date.

6 Vesting of Crown Land

- 6.1 The Crown Land will vest in the Crown on the Vesting Date.

7 Issue of Certificate of Title

- 7.1 Notwithstanding any other provision in this Proposal, the Commissioner will not request that the Surveyor-General issue a certificate to the Registrar pursuant to section 116 of the Land Act 1948 (to enable a certificate of title to issue for the Freehold Land) unless and until:
- (a) the Commissioner has received the Holder's Payment from the Holder under clause 4, and all other money payable by the Holder under this Proposal and the Notice;

Any new mortgage will be registered after any other encumbrances such as any easements and/or covenants are registered.

Three easement areas are required as marked on the plan attached to the proposal.

One easement area is located over the main farm access track at the eastern property boundary continuing for approximately 200m within the proposed conservation area before the track emerges onto the proposed freehold area.

One easement area is located over an existing farm track for approximately 500m over the proposed conservation area on the lower slopes above Tramway Stream and links the grazing concession area on the southern slopes above Tramway Stream with the proposed freehold land. Both these easement areas are for farm management purposes and stock access along traditionally used access tracks on this part of the property with the term of the easement to Tramway Stream being linked with the term of the grazing concession.

The third easement area is located along the southern upper branch of Coal Stream and extends approximately 500m into the proposed conservation area to provide for the installation of a water supply pipeline.

2.1.3 Description of potential affects of proposed activity and any actions proposed to avoid, mitigate or remedy any adverse affect:

The easement concession routes for farm management and stock access purposes are over existing access tracks which have traditionally been used in the management of the property. They are the most practical access routes across these areas of the property. Access will be confined to the existing access track where these activities have always taken place so affects will generally be limited and confined to the width of the easement area.

The easement concession for the water supply pipeline will require initial establishment disturbance but will then be limited to repairs and maintenance.

Any effects will be mitigated by the terms of the concession including restrictions on earth disturbance, depositing of materials, lighting of fires and disturbance of waterways.

2.1.4 Details of the proposed type of concession:

An easement concession under S. 17Q (1) Conservation Act 1987.

2.1.5 Proposed duration of concession and reason for proposed duration.

Proposed duration: in perpetuity for two easement areas; and for a total term of 20 years to link with the term of the grazing concession for the third easement area.

The easement concession areas are essential to the running of the farming operation to enable the continuation of convenient access to areas of land either suitable for freeholding that has had the traditional access route encompassed into the proposed Conservation Area, or has been proposed as suitable for a grazing concession and requires access across the proposed Conservation Area. The period of the concession will allow surety for the ongoing operation of the farm on the main track and be linked to the grazing concession term for the Tramway Stream track. The easement area required for the water supply pipeline is essential for providing water for the farming operation and will provide the assurance of a continual water supply.

2.1.6 Relevant information:

The lessees of Chetwynd Pastoral Lease have entered into this review voluntarily. The proposed easement concession routes are essential for ongoing management of the farm and the effects on the area which the easement route is to cross will be limited.

2.2 Grazing concession CA2

2.2.1 Description of the proposed activity:

Grazing Concession for 500 sheep only for 1 period of 8 days between 1st March and 30th April each calendar year, and grazing of 50 cattle only for 2 separate periods of 3 weeks between 1st May and 31st August each calendar year.

2.2.2 Description of area where proposed activity is to be carried out and proposed status:

The location of the Grazing Concession is over the lower southern slopes above Tramway Stream on the Albury Range. The area will be designated as land to be restored to or retained in Crown Control as a Conservation Area subject to a grazing concession.

2.2.3 Description of potential affects of proposed activity and any actions proposed to avoid, mitigate or remedy any adverse affect:

The area contains scattered shrubland communities that are representative of the original vegetation of the area. Potential threats to the area from excessive grazing are limitations for potential regeneration of native plant communities.

Grazing has traditionally been a component of this area. In order to achieve an outcome as part of the tenure review process some controlled grazing was agreed to

as being essential to the farming operations of the property. It was considered that in order to mitigate any adverse effect on the land during the term of the Grazing Concession, the Grazing Concession should contain a number of conditions including, but not limited to, the following:

- a) Stock limits as detailed in Clause 1 above during the proposed term of the Grazing Concession.
- b) Pest control if required by the Minister of Conservation, the costs to be borne by the Concessionaire.
- c) The Minister of Conservation may set up a monitoring system to ascertain the effects of on-going grazing and this monitoring system will be reviewed every three years. The Minister of Conservation reserves the right to adjust the stock numbers in order to meet conservation objectives.
- d) The term of the grazing concession is limited to 10 years with one right of renewal.

2.2.4 Details of the proposed type of concession:

A Grazing Licence Concession under section 17Q of the Conservation Act 1987.

2.2.5 Proposed duration of concession and reason for proposed duration.

Proposed duration: 10 years from settlement date with one right of renewal.

Reason for proposed duration:

- a) to allow security of tenure to the Concessionaire for farm management purposes while adjustments are made to the current farming practises; and
- b) to allow for monitoring results and adjustments in stock numbers if required.

2.2.6 Relevant information about the proposed Grantee including information relevant to the Grantee's ability to carry out the proposed activity:

Proposed Grantee: Ian G Callaghan and Sonia F Callaghan.

Relevant information: The significant inherent values have been surviving under the current grazing regime. The Callaghans have the ability to farm the area without serious effect on conservation objectives while adjustments are made to current farming practises.
