11 Fencing

- 11.1 If the Holder has accepted this Proposal and that acceptance has taken effect pursuant to the Act, the Commissioner will, at its cost, erect new fencing approximately along the line marked as such on the Plan (if any).

- 11.3 If the Commissioner has not completed any fencing as set out in Appendix 3 by the Settlement Date, the Holder agrees that the Commissioner may register a covenant, on terms entirely satisfactory to the Commissioner (in the Commissioner's sole discretion), over the Freehold Land to enable the Commissioner to complete such fencing. 12 Apportionments

- 12.1 Rent payable under the Lease in respect of the Freehold Land shall be apportioned as follows:
- (a) Rent paid or payable will be apportioned on the Settlement Date as at the Settlement Date and either deducted from or added to (as the case may be) the amount required to settle.

Schedule Two: Provisions relating to the Schedule Two Land

1 Details of designation

- 1.1 Under this Proposal the land shown marked in pink and labelled HR on the Plan, being 15 hectares (approximately) is designated as land to be resorted to or retained in Crown control as historic reserve subject to the granting of the grazing concession substantially as set out in Appendix 4;
- 1.2 Under this Proposal the land shown marked in pink, labelled SR2 on the Plan and shown as routes "d -e", "d -h" and "f -g", being 460 hectares (approximately) is designated as land to be resorted to or retained in Crown control as scenic reserve subject to the granting of the easement concession substantially as set out in Appendix 5;

2 Information Concerning Proposed Grazing Concession - Muddy Terrace

- 2.1 The activity proposed is that of grazing sheep and cattle on the same scale as is carried out on the adjoining land. The concession also allows for the use of vehicles on the existing farm access track, and horses and dogs on the land for mustering purposes.
- 2.2 The area comprises three small river flats adjacent to the Dome Burns and is vegetated in exotic grasses and herbs and a mixture of broom and native shrubs. The area contains the Muddy Terrace water race, causeway, reservoir and restored racemans hut all of which are of high historic significance. The proposed status for the area is a reserve for the purpose of protection of historic reserves to be managed by the Department of Conservation.
- 2.3 Continued sheep and cattle grazing, combined with ongoing weed control will have a positive effect and is necessary to control rank growth of pasture grasses and broom regrowth. Some strategic cattle fencing around relics such as the racemans hut maybe needed to prevent damage from stock.
- 2.4 The grazing concession is a grazing licence granted under section 17Q(1) of the Conservation Act by virtue of Section 59A Reserves Act 1977.
- 2.5 The proposed duration of the concession is 30 years. This is because the concession essentially caters for a continuation of existing grazing use of the area by the Holder. There is no foreseeable reason why grazing over the 30 year period will result in adverse effects, so long as the existing stock numbers are grazed
- 2.6 The appropriateness of the grazing regime will be periodically assessed. If for some unseen reason, grazing is having a negative effect on historic values or public enjoyment of the area, the concession can be terminated or modified. The Grazing Concession will contain a clause enabling cancellation at short notice if unacceptable damage to historic features is occurring.
- 2.7 The proposed grantee of the Grazing Concession is the Holder, Glenlapa Station Limited. The Holder currently grazes the area which forms part of the lease land. Over the period of the Holder's Tenure on the area, the Holder has respected the value of the historic sites on the property. Department of Conservation currently has a good working relationship with the Holder over a variety of issues including maintenance of shared boundary fencing, wilding pine and pest control.

3 Information Concerning Proposed Easement Concession – Farm Access to the Midslope Faces of Mataura River

- 3.1 The proposed Easement Concession permits the use of dogs, horses, motor vehicles, machinery and implements associated with farm management purposes of the land to which it provides access.
- 3.2 The proposed Easement Concession lies along an existing 4WD track which traverses for approximately 1 km through the proposed addition to the East Dome Scenic Reserve. This track links lands proposed for freeholding in the Mataura and Dome Burn catchments which are bisected by the proposed reserve.
- 3.3 The proposed status of the area to be subject to the Easement Concession is scenic reserve.
- 3.3 The use of the Easement Concession as proposed is not likely to create any adverse effects. It is considered that the easement terms contain sufficient controls to avoid, mitigate or remedy any adverse effects. The Easement contains clauses dealing with protection of the environment, interference with natural features, storage of noxious substances and obstruction of the public enjoyment of the area. Department of Conservation staff will periodically visit the scenic reserve and will therefore be aware if the concession activity is having any negative effects.
- 3.4 The Easement Concession is an easement granted under section 17Q(1) of the Conservation Act by virtue of Section 59A Reserves Act 1977.
- 3.5 The Easement Concession is granted in perpetuity. This is because the land in the Matuara catchment to which the easement provides access is separated from the balance of proposed freehold land in the Dome Burn catchment. The proposed Easement Concession represents the only practical access between these two areas which form part of the one farming operation.
- 3.6 The proposed grantee of the Easement Concession is the Holder, Glenlapa Station Limited. The Holder currently owns and uses the track over which the easement concession is proposed. No negative effects associated with the current use of the track have been noted. Department of Conservation currently had a good working relationship with the Holder over a variety of issues including fencing on a common boundary and wilding pine and pest control.

Handwritten initials and a number 8.

1 Details of designation

1.1 Under this Proposal the land shown marked in green on the Plan, being 3907 hectares (approximately) is designated as land to be disposed of by freehold disposal to the Holder subject to:

- (a) Part IVA of the Conservation Act 1987;
- (b) Section 11 of the Crown Minerals Act 1991;
- (c) the easements substantially as set out in Appendices 6 ,7 and 8.

SCHEDULE 3

MANAGEMENT PRESCRIPTION DOCUMENT FOR MUDDY TERRACE HISTORIC RESERVE GRAZING CONCESSION

As this concession is for a term exceeding 10 years a management prescription document is required. A management prescription in the concession conditions provides, over the full term:

1. The specific goals of management of the land consistent with the nature of the concession activity (covering vegetation, landscape, historic, public recreation, soil and water).
2. A description of how the goals are to be met.
3. A detailed description of the type and condition of historic resources at the commencement of the concession.
4. A description of the monitoring programme of activity effects to be carried out for vegetation and historic features.
5. A specification concerning grazing systems, including identification of vegetation trends and how that will affect the grazing systems.

This management prescription document shall apply until it is reviewed ten years from the date of commencement of the concession and every ten years thereafter.

1. The goal of the concession is to achieve the protection of historic sites, landscape values, vegetation, soil and water values and recreational opportunities whilst allowing for limited sheep and cattle grazing.
 - (a) **Vegetation**

To manage the vegetation within the reserve (concession area) to maintain or enhance the cover of exotic and introduced grass and herb species whilst controlling the risk of invasion by exotic woody weeds and trees.
 - (b) **Landscape**

To manage the reserve (concession area) in a manner which retains and enhances the open landscape character and maintains and enhances the physical presence of visible historic features which includes the water-race, causeway, reservoir and restored racemans hut.
 - (c) **Recreation**

To facilitate public foot access within the reserve. Appropriate interpretative information and sign posting will be erected where required.
 - (d) **Soil and Water**

To manage the concession in a manner which prevents soil loss and maintains high water quality.
2. These goals are to be met through regular monitoring (including general inspections), liaison with the Concessionaire and revision of grazing limits prior to the preparation of management prescription documents.

RELEASED UNDER THE OFFICIAL INFORMATION ACT

- 13 -

- (a) Grazing levels and management will be adjusted should that be necessary following analysis of photo point monitoring and field observations by the Grantor or Concessionaire.
- (b) Boundary sign posting indicating the status of the land and conditions pertaining to public use will be erected.
- (c) The concession document requires the Concessionaire to comply with the legal obligations of the Biosecurity Act. The Concessionaire may also wish to carry out a programme of woody weed and tree control beyond any obligations under this act. In order to prevent adverse effects to conservation features present, some accepted methods of control suitable for agricultural purposes may need to be restricted.

Methods of woody weed control practices are to be limited to:

- (i) hand cutting and poison treatment of stumps; and/or
- (ii) hand-held spraying, eg. from a vehicle mounted operation, with hand cutting of dead branches; and/or
- (iii) prill treatment with hand cutting of dead branches; and/or.
- (iv) Aerial spraying by helicopter.

A weed control programme will be jointly agreed to by the Concessionaire and the Murihiku Area Manager, Department of Conservation, Invercargill which will determine what method(s) are to be used and where.

Given that these method(s) are likely to be more expensive than those practised for normal agricultural purposes, the cost of weed control will be apportioned on the basis that the Concessionaire meets those costs to meet his/her legal obligations and the Grantor will meet the difference in costs of the above accepted methods (if any) in order to safeguard the conservation features. Any dispute in determining these costs will be resolved according to clause 18 of the concession document.

Under the terms of the concession the Concessionaire has the responsibility for pest control.

3. Description and condition of historic resources present.

The boundaries of the historic reserve (concession area) extend from a point adjacent to where the pipeline crosses the Dome Burn downstream to the property boundary. The reserve contains the largest remaining intact section of the Muddy Terrace Water Race, which is one of the largest mining races in Otago/Southland. Within the boundaries of the reserve are three small river flats. On these flats, in addition to the water race, are other important associated historic features such as a restored sod construction racemans hut, a light rail causeway, reservoirs and remains of other dwellings.

4. Description of a monitoring programme to be established for historic sites, vegetation condition and soil and water values

Photo points are to be established and located at the racemans hut which is considered vulnerable to stock damage, woody weed invasion or other factors. Other features susceptible to damage include the water race formation. This is to be inspected annually to monitor the impact of cattle on the formation. The extent of use and maintenance of the farm access track through the reserve will also be inspected annually. Additional photo points will be established which will provide a general record of vegetation cover, composition and condition.

5. Number of stock and duration permitted to be run on the concession area within the current term of the management prescription document.

Sheep and cattle grazing in conjunction with the adjoining land at stocking levels current at 2000.
