2 Conditions

- 2.1 This Proposal, and any agreement arising therefrom, is subject to the conditions contained in Schedule Eight (if any).

3 Settlement

- 3.1 Unless otherwise agreed by the parties, the Settlement Date for the disposal of the Freehold Land to the Holder by freehold disposal will be the day that is TEN (10) working days following the day on which Land Information New Zealand notifies the Commissioner that the Final Plan and a copy of this Proposal are registered in accordance with the Act.

- 3.2 The Freehold Land will be disposed of to the Holder under the Land Act 1948.

- 3.3 Notwithstanding anything to the contrary, if, as at the Settlement Date (as determined pursuant to clause 3.1), the rent payable under the Lease is subject to a Rent Review, then the Commissioner may elect to:

(a) settle on the Settlement Date on the basis that the Commissioner may retain from the Commissioner's Payment an amount which the Commissioner, acting reasonably, estimates will be payable by the Holder to the Commissioner following agreement or determination of the Rent Review ("the Retention"). The Retention shall be held by the Crown Law Office in an on-call, interest-bearing trust account in the joint names of the parties for their respective rights and interests. Upon agreement or determination of the Rent Review, the Commissioner shall calculate the *rent* shortfall payable by the Holder to the Commissioner in respect of the period from the effective date of the Rent Review to the Settlement Date, both dates inclusive ("the Shortfall"). If:

(i) the Shortfall is less than the Retention and the net interest earned thereon, the balance shall be paid by the Commissioner to the Holder within TEN (10) working days; or

(ii) the Shortfall is more than the Retention and the net interest earned thereon, the balance shall be paid by the Holder to the Commissioner within TEN (10) working days;

or

(b) defer the Settlement Date until TEN (10) working days after the rent payable as a consequence of the Rent Review:

(i) has been agreed or determined; and

(ii) is *not* and will not be subject to any appeal, rehearing or other proceedings.

4 Holder's Payment

- 4.1 By 3.00 p.m. on the Settlement Date, the Holder must pay the Holder's Payment and all other money payable to the Commissioner or the duly appointed agent of the Commissioner by bank cheque without set-off or deduction of any kind in accordance with the settlement requirements of the Commissioner.

- 4.2 If the Holder fails to pay the Holder's Payment or any part of it or any other money to the Commissioner or to the duly appointed agent of the Commissioner on the Settlement Date clause 19 will apply.

5 Commissioner's Payment

- 5.1 The Commissioner shall pay the Commissioner's Payment to the Holder on the Settlement Date.
- 5.2 No interest shall be payable to the Holder by the Commissioner in respect of the Commissioner's Payment, including (without limitation) for the period from the Vesting Date to the Settlement Date.

6 Vesting of Crown Land

- 6.1 The Crown Land will vest in the Crown on the Vesting Date.

- 7.1 Notwithstanding any other provision in this Proposal, the Commissioner will not request that the Surveyor-General issue a certificate to the Registrar pursuant to section 116 of the Land Act 1948 (to enable a certificate of title to issue for the Freehold Land) unless and until:
- (a) the Commissioner has received the Holder's Payment from the Holder under clause 4, and all other money payable by the Holder under this Proposal and the Notice;

2 Information Concerning Proposed Concession

CONCESSION 8.39 CPLA - GLENTANNER PASTORAL LEASE

Information on proposed concession provided by Director-General of Conservation (section 39 CPL Act)

Explanatory note: This information is required in the event that the CCL accepts the recommendation of the Director-General to designate land as land to be restored to or retained in Crown control subject to the granting of a Concession or over which a Concession is granted. This information must be provided for each Concession if more than one is proposed. The Concession may require the provisional consent of the Minister of Conservation (section 41 CPL Act)

1. Description of the proposed activity:

Tourism Concession and Commercial Filming and Photography Concession Licence for the adjoining landholder for the purpose of the business of:

- Guided; walking, tramping, climbing, rock climbing, mountaineering, mountain biking, horse trekking, ATV and 4WD touring, fishing, camping, commercial ground based hunting, ski touring.
- Guided; heli-skiing, heli-boarding.
- Scenic snow landings.
- Heli-landings for the purposes of positioning recreationists and commercially guided groups.
- Heli-landings for the drop off and/or pick up of heli-hiking, heli-biking and heli-fishing clients.
- Commercial filming and photography.

2. Description of area where proposed activity' to be carried out and proposed status:

The area of the Concession Activity is over the areas designated as Conservation Area of 8,670 hectares on the Ben Ohau Range and the areas designated as Scenic Reserve of 440 hectares on the Tasman River river flats on the plan attached to the proposal. The area covers the eastern faces of the Ben Ohau Range between Whale Stream and Birch Stream and the flats on the true right of the Tasman River between Lake Pukaki and Birch Stream.

3. Description of potential affects of proposed activity and any actions proposed to avoid mitigate or remedy any adverse affect:

The potencial affects of the concession include potential damage to the flora and fauna by people moving through the area, although this may also happen with general public use of the Conservation Area for similar purposes, and the impacts of helicopter activities. Helicopter use in this area has occurred for a number of years and is in fact seen as an alternate use area to the adjacent Aoraki/Mt Cook National Park, where landings are tightly controlled. Some of the activities will occur over high altitude lands that will on many occasions be snow covered and during that time will have no direct impact on the diversity of the flora in the alpine zone. The Concession Licence document ensures that the provisions of the Conservation Act apply and includes monitoring of the concession activity and the ability to modify activities to avoid, remedy or mitigate adverse effects. Through Schedule 2 limitations are placed on party sizes and restrictions on aircraft activities. Schedule 2 ensures the rights of the public are not restricted. The concession provisions ensure that all potential affects will be minimised.

4. Details of the proposed type of concession:

A Concession Licence under S. 17Q (1) Conservation Act 1987.

5. Proposed duration of concession and reason for proposed duration.

Proposed duration of Tourism Concession: 30 years (no right of renewal).

Proposed duration of Commercial Filming and Photography Concession: 10 years (no right of renewal).

Reason for proposed duration: The activities sought under this Concession are already occurring on this land and are part of the financial viability of Glentanner Station. It is appropriate to ensure that Glentanner Park (Mt Cook) Limited has some certainty into the foreseeable future, as tourism is part of the success of Glentanner Park (Mt Cook) Limited. Glentanner Park (Mt Cook) Limited has a current recreation permit for multi-use activities over the land for a term of fifteen years which expires in 2010. This concession will allow the activities to continue.

6. Relevant information about the proposed Concessionaire including information relevant to the Concessionaire's ability to carry out the proposed activity:

Proposed Concessionaire: Glentanner Park (Mt Cook) Ltd.

Relevant information: Glentanner Station Limited, the owner of Glentanner Park (Mt Cook) Ltd, has entered into this review voluntarily and has been keen for some time to resolve many long-standing issues. The current recreation permit has been in operation for a number of years and has been very successful. This Concession will enable the Concessionaire to continue this operation and build on it, thus ensuring the viability of Glentanner Park (Mt Cook) Ltd into the future. The impacts of this Concession are considered to be minimal and will compliment the restricted range of recreation activities that are allowed in the adjoining Aoraki/Mt Cook National Park.

SCHEDULE 4

Environmental Care Code

Protect Plants and Animals

Treat New Zealand's forest and birds with care and respect. They are unique and often rare.

Remove Rubbish

Litter is unattractive, harmful to wildlife and can increase vermin and disease. Plan your visits to reduce rubbish, and carry out what you carry in.

Bury Toilet Waste

In areas without toilet facilities, bury your toilet waste in a shallow hole well away from waterways, tracks, campsites and huts.

Keep Streams and Lakes Clean

When cleaning and washing, take the water and wash well away from the water source. Because soaps and detergents are harmful to water life, drain used water into the soil to allow it to be filtered. If you suspect the water may be contaminated, either boil it for at least three minutes, or filter it, or chemically treat it.

Take Care With Fires

Portable fuel stoves are less harmful to the environment and are more efficient than fires. If you do use a fire, keep it small, use only dead wood and make sure it is out by dousing it with water and checking the ashes before leaving.

Camp Carefully

When camping, leave no trace of your visit.

Keep to the Track

By keeping to the track, where one exists, you lessen the chance of damaging fragile plants.

Consider Others

People visit the back-country and rural areas for many reasons. Be considerate of other visitors who also have a right to enjoy the natural environment.

Respect Our Cultural Heritage

Many places in New Zealand have a spiritual and historical significance. Treat these places with consideration and respect.

Enjoy Your Visit

Enjoy your outdoor experience. Take a last look before leaving an area; will the next visitor know that you have been there?

Protect the environment for your own sake, for the sake of those who come after you, and for the environment itself.

Water Care Code

Find Out First

Find out and follow the regulations governing recreational use of waterways and access. They are designed to minimise conflict between users and protect everyone's health and safety.

Stay on Established Tracks and Use Existing Facilities

By using existing facilities, where these are provided, you run less chance of disturbing wildlife and damaging riverbanks and foreshores.

Take Care of Your Gear

Careless use of equipment can harm wildlife and other users.

Remove Rubbish

Litter is unattractive, harmful to wildlife and pollutes water. Plan your visit to reduce rubbish, and carry out what you carry in.

Dispose of Toilet Waste Properly

Improper disposal of toilet waste can contaminate water, damage the environment and is culturally offensive. Use disposal facilities where provided or bury waste in a shallow hole at least 50 metres away from waterways.

Be Careful with Chemicals

Use chemicals sparingly, and refuel with care. Dispose of cooking or washing water well away from the source.

Respect Our Cultural Heritage

Many New Zealand waterways have special cultural, spiritual or historical values. Treat these places with consideration and respect.

Take Only the Food You Need

When taking food from the sea or freshwater, don't overdo it. Sustain life in our waterways by taking only what you need and no more than the legal limit.

Consider Plants and Animals

Remember we are only visitors to water environments. Other animal and plant species live there all the time.

Consider Other People

Respect other visitors ... everyone has the right to enjoy the environment in safety.

SCHEDULE 5***Didymo Prevention Guidelines*****Stop the Spread**

Didymo is an invasive freshwater alga that can form massive blooms, smothering rocks, submerged plants and other material. Didymo is made up of cells that cannot be seen with the naked eye until large colonies form. It only takes one of these cells to survive and be transported to a nearby waterway for Didymo to spread. Didymo cells thrive in freshwater and if you are cleaning with freshwater you are helping to keep them alive.

Didymo is an unwanted organism under the Biosecurity Act 1993. Under the Act those knowingly spreading an unwanted organism can be liable for up to five years' imprisonment and/or a \$100,000 fine.

To ensure you do not spread Didymo, wherever possible restrict equipment, vehicles, boats, clothing and other items for exclusive use in a single waterway.

The Concessionaire shall, when moving items (including all persons, equipment and vehicles that have contact with water) between waterways:

1. **Check:** Before leaving the river or lake, remove all obvious clumps of algae and look for hidden clumps. Leave them at the affected site. If you find any later, do not wash them down drains. Treat them with the approved cleaning methods below and put them in a rubbish bin.

CLEAN: There are several ways to kill didymo. Choose the most practical treatment for your situation which will not adversely affect your gear.

Non-absorbent items

- **Detergent:** soak or spray all surfaces for at least one minute in 5% dishwashing detergent or nappy cleaner (two large cups or 500mls with water added to make 10 litres); OR
- **Bleach:** soak or spray all surfaces for at least one minute in 2% household bleach (one small cup or 200mls with water added to make 10 litres); OR
- **Hot water:** soak for at least one minute in very hot water *kept above* 60 °C (hotter than most tap water) or for at least 20 minutes in hot water *kept above* 45 °C (uncomfortable to touch).

Absorbent items require longer soaking times to allow thorough saturation.

- **Hot water:** soak for at least 40 minutes in hot water kept above 45 °C; OR
- **Hot water plus detergent:** soak for 30 minutes in hot water kept above 45 °C containing 5% dishwashing detergent or nappy cleaner; OR

Freezing any item until solid will also kill didymo.

DRY: Drying will kill didymo, but slightly moist didymo can survive for months. To ensure didymo cells are dead by drying, the item must be *completely dry* to the touch, inside and out, then left dry for at least another 48 hours before use.

If cleaning or drying is not practical, restrict equipment to a single waterway.

2. Not move fish, plants, rocks and other river/lake items between waterways.
3. Ensure felt-soled waders and other felt-soled footwear and equipment are not worn in any waterway.

If you require more information please visit:

www.biosecurity.govt.nz/didymo

To report a suspected find of Didymo please call 0800 80 99 66

NB: When cleaning equipment, we recommend that you:

- soak porous materials for longer than the specified decontamination times to ensure cleaning solution has soaked right through the item before soaking for the required decontamination time
- choose a decontamination solution that will not adversely affect your equipment
- follow manufacturer's safety instructions when using products
- dispose of cleaning waste well away from waterways
