- 3.2 The Freehold Land will be disposed of to the Holder under the Land Act 1948.

- 3.3 Notwithstanding anything to the contrary, if, as at the Settlement Date (as determined pursuant to clause 3.1), the rent payable under the Lease is subject to a Rent Review, then the Commissioner may elect to:

(a) settle on the Settlement Date on the basis that the Commissioner may retain from the Commissioner's Payment an amount which the Commissioner, acting reasonably, estimates will be payable by the Holder to the Commissioner following agreement or determination of the Rent Review ("the Retention"). Upon agreement or determination of the Rent Review, the Commissioner shall calculate the rent shortfall payable by the Holder to the Commissioner in respect of the period from the effective date of the Rent Review to the Settlement Date, both dates inclusive ("the Shortfall"). If:

3. Values of Land to be Protected (Section 77, Reserves Act 1977)

CC1- Northern Corner of Island Hills – Natural Environment, wildlife habitat and historical values

- The covenant area covers the northern lower slopes of the organ Range, draining into both the Mandamus River and into Gorge Stream. The land supports intake and continuous sequences from lower-altitude shrublands, riparian beech forest, though mid-altitude forest, to mid-altitude grasslands.
- The remnant and regenerating woody plan communities in this area are representative of the original character of the district and include species such as mountain beech, *Coprosma* spp, porcupine shrub, matagouri, mountain tauhinu, *hebe* spp, *Helichrysum lanceolatum*, mountain wineberry, *Corokia cotoneaster*, native broom, kanuka and manuka.

- The fauna in this area are representative of the original communities, including lizard, bird, fish and invertebrate species.
- The area provides habitat for several threatened bird species: eastern falcon (nationally vulnerable), black shag (naturally uncommon), New Zealand pipit (declining), South Island rifleman (declining) and South Island robin (declining).
- Mixed shrubland on mid slopes in the Organ Stream catchment supports populations of a nationally vulnerable plant species at its northern limit *Olearia fimbriata*.
- Kanuka forest and manuka scrub on sunny slopes supports populations of two at risk plant species: *Traversia baccharoides* and *Senecio dunedinensis*.
- The land contains a formed though degraded pack track of historic significance, linking Mandamus River and Gorge Stream. This track is of special cultural significance due to its association with the late Sir Charles Upham; additionally, the track is one of the few remaining examples of tracks put in using a single farrow plough.

CC2 – East Faces of the Northern Organ Range – Natural environment, wildlife habitat and landscape amenity values

- The covenant area covers the higher altitude parts of the Organ Range, particularly the eastern facing slopes but also including some lower parts of Gorge Stream. On the east side, the covenant covers the majority of Organ Stream as well as the east draining streams off Nicholsons Knob. The land supports intact and continuous sequences from lower-altitude shrublands, riparian beech forest, through mid-altitude forest, to high altitude rocklands.
- The remnant and regenerating woody plant communities in this area are representative of the original character of the district and include species such as mountain beech, *Coprosma* spp, porcupine shrub, matagouri, mountain tauhinu, *Hebe* spp., *Helichrysum lanceolatum*, mountain wineberry, *Corokia cotoneaster*, native broom, kanuka and manuka.
- The area provides habitat for a several threatened bird species: eastern falcon (nationally vulnerable), black shag (naturally uncommon), kea (naturally uncommon), New Zealand pipit (declining), South Island rifleman (declining) and South Island robin (declining).
- The large ground beetle (*Megadromus rectalis*) is at the extremity of its range.
- Habitats on the covenant support populations of three plant species at the extremity of their range or very uncommon in this area: *Hebe hectorii* subsp. *demissa*, *Pachycladon fastigiata* and *Helichrysum depressum* X *filicaule*. Additionally, kanuka forest and manuka scrub on sunny slopes support populations of two at risk plant species: *Traversia baccharoides* and *Senecio dunedinensis*. Other threatened plant values include *Coprosma acerosa* (declining) on montane screes and *Stenostachys gracilis* (data deficient) in beech forests.
- Small areas on alluvial terraces in the Mandamus valley are within a chronically threatened land environment and support indigenous plant communities, with numerous small wetlands along the terraces also.
- All parts of this area retain high level of natural landscape character, and the fluted rock formations (organ pipes) on the Organ Range are iconic and striking and hold high significance for landscape values.

SCHEDULE 2

Special Conditions

1. Notwithstanding clause 3.1.1, that part of the Land being CC1 may be grazed by beef cattle only at a stocking rate not to exceed 250 cows with calves or 350 dry cows. The stock may graze for any one continuous 120 day period between the 1st of November to the 30th of April inclusive in each calendar year.
2. Notwithstanding clause 3.1.5, that part of the Land being CC1 may be over sown with pasture grass and fertilised except for a 20 metre margin adjoining any waterways. The Minister is required to approve in advance the pasture grass seed to be applied
3. Notwithstanding clause 3.1.5, parts of that part of the Land being CC1 may be sprayed to allow for continued stock access and grazing areas; however, spraying may not exceed 10 hectares in any calendar year. The areas to be sprayed must be approved by the Minister in advance and must specifically exclude all areas of mature forest and woody vegetation over three metres in height. In accordance with clause 13.2, such approval will not be unreasonably withheld provided the terms of this condition are met.
4. Notwithstanding clause 3.2.1 and 3.2.3, the Owner must control wilding pines, exotic broom and gorse on the Land and must prevent them seeding. The Owner will bear the cost of this work. Should the Owner fail to undertake this work the Minister may arrange to have this work undertaken and the Owner will bear the cost which may include reasonable costs of the Minister. Where the liabilities are significant, the Owner will submit to the Minister for approval in advance an eradication plan for the control of wilding pines, exotic broom and gorse.
5. Notwithstanding clause 3.2.1, the Owner must control wild animals including rabbits, deer, goats and pigs to a level low enough to avoid damage to the Land. The Owner will bear the cost of this work. Should the Owner fail to control animals at an appropriate level the Minister may arrange to have this work undertaken and the Owner will bear the cost which may include reasonable costs of the Minister. Where the liabilities are significant, the Owner will submit to the Minister for approval in advance an eradication plan for the control of wild animals including rabbits, deer, goats and pigs.
6. Notwithstanding clause 3.1.6, the Owner may continue to use and maintain the existing vehicle track from the boundary of the Land into the hut known as "Valley Camp Hut". This track is shown on the map as route "c-d" as shown in Schedule 3.
7. Notwithstanding clause 3.1.6, the Owner may continue to use, maintain and enhance the walking route on the Land which is part of the "Hurunui High Country Track" as shown on the map in Schedule 3. For clarification, enhancement of the track may include benching or creation of steps. It may also include creating additional small tracks off the main track to key vantage points; but such additional tracks will require the approval in advance of the Minister.
8. Notwithstanding clause 3.1.6, the Owner may continue to use the pack track route from Valley Camp Hut to Gorge Stream, as shown on the plan in Schedule 3. Such use by the Owner may include with motor vehicle or on horse. Any vegetation that impedes access along this track may be cleared; however, no other earth works are permitted without the approval in advance of the Minister. Any request for consent to earth works pursuant to this clause will be considered by the Minister with regard to the values of the land to be protected and specifically to the pack track formation. The Minister shall also consider the reasonable

and justifiable need for the earth works for farm management purposes or benefit to the "Hurunui High Country Track.

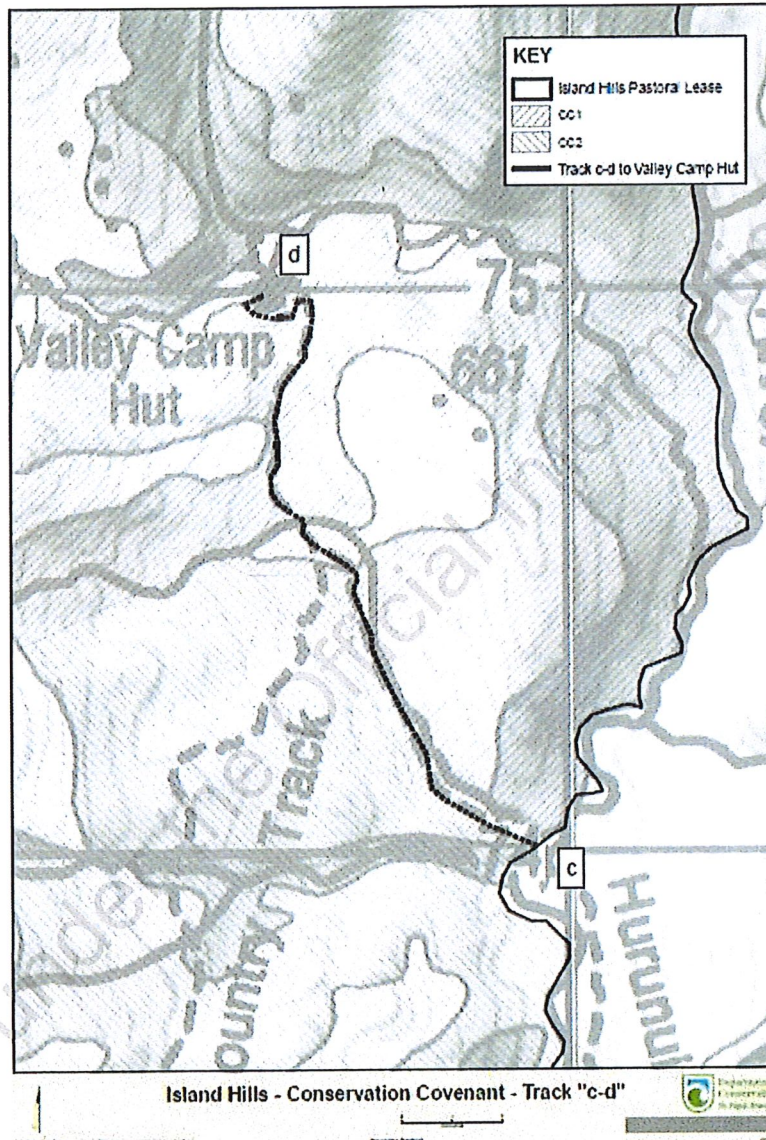

9. Notwithstanding clauses 3.1.4 and 3.1.10, the Owner may place and maintain beehives on the Land and continue the associated beekeeping activity. For the avoidance of doubt, and in accordance with clauses 3.1.2 and 3.1.6 the Owner still requires the Minister's approval in advance where the Owner wishes to undertake works to clear new beehive sites on the Land and/or to construct new tracks to place or access beehives on the Land.

3. In considering any request by the Owner for an approval in terms of Clause 2 hereof, the Board will not unreasonably withhold its consent if it is satisfied that the proposed work is in accordance with the aim and purpose of the covenant as contained in the First Schedule.
4. Except with the prior written consent of the Board, no action shall be taken or thing done, either on the land or elsewhere, which will in any way cause deterioration in the natural flow, supply, quantity, or quality of any river, stream, lake, pond, marsh, or any other water resource affecting the land.
5. 14. The Trust may, with the prior approval of the Minister of Lands, revoke this covenant if all the members of the Board are satisfied that by reason of any change in the character of the land or of any other circumstances which the Board may deem sufficiently material, this covenant ought to be deemed obsolete, or that the continued existence thereof would impede the reasonable use of the land without securing any practical benefit consistent with the purpose of the Act.
15. Nothing in these presents hereinbefore contained shall be deemed to render the Covenantor personally liable for any breach of these covenants and conditions committed after the Covenantor shall have ceased to be the Owner.
