5.0	Signage	5
6.0	Water Takes	6
7.0	Proposed Spray Areas	6

## 1.0 Permitted Activity & Resource Consents

Treatment of lakeweed at Lake Benmore using the herbicide, diquat, is a permitted activity under the Canterbury Land and Water Regional Plan under section 'Pest Control and Agrichemicals', Rule 5.2.2 - Discharge of an agrichemical. Please see a link to the Plan below:

https://www.ecan.govt.nz/your-region/plans-strategies-and-bylaws/canterbury-land-and-water-regional-plan/

Sailors Cutting is within a Community Drinking Water Drinking Protection Zone as designated by Environment Canterbury. A resource consent has been obtained to treat lakeweed with the herbicide, diquat. (consent number CRC213071). This consent stipulates additional requirements to ensure the safety of drinking water. This consent expires on 11 May 2026.

# 2.0 Pre-Spray Monitoring and Proposed Control Sites

A surface-based aquatic weed delimitation survey was carried out on **Thursday 27 March 2025.** At the time of survey, the weed and water conditions were fit for diquat treatment.

The following sites are scheduled for treatment:

- Sailors Cutting
- The Neck

## 3.0 Herbicide Application

Boat based aquatic weed spraying is scheduled to occur over **two days** between **Wednesday 26 March 2025** and **Thursday 17 April 2025**, as weather, weed and water conditions permit. Treatment will not take place during weekends or on public holidays.

As a precautionary measure only, Land Information New Zealand advises users not to take water from Lake Benmore to consume or for irrigation purposes from the vicinity of the treatment area until **24 hours** after treatment has been completed.

Notices will be placed at www.linz.govt.nz 24 hours prior to the planned spray dates. Warning signs will be placed at authorised public boat ramps prior to and during treatment and will be removed 24 hours after treatment. Changeable weather conditions may result in delays to weed spraying.

Please scan the QR code below to access the most up-to-date information on control timings.

The Hazard classification for diquat is 6.1C, 6.3A, 6.9A, 8.1A, 9.1A and 9.3C.

For more information on the herbicide diquat, please visit:

### 4.0 Notifications

#### 4.1 Newspaper advertisements

Advertisements were placed in **The Press** on the following dates:

- Wednesday 19 March 2025
- Monday 24 March 2025

Advertisements were placed in the **Timaru Herald** on the following dates:

- Wednesday 19 March 2025
- Monday 24 March 2025

#### 4.2 Stakeholder emails

Emails are sent to the comprehensive stakeholder list in advance of proposed spray dates, the day before spraying, on the day(s) of spraying and at the conclusion of spraying. Please email **biosecurity@boffamiskell.co.nz** if you would like to be added to the mailing list.

# 5.0 Signage

Warning signage is erected at key lake access points prior to application and is removed once the 24 hour stand down period for swimming, fishing and taking water has elapsed (Figure 1). Signage will be erected at the locations in the map below (Figure 2).

Figure 1. An example warning sign that will be erected key lake access points.

Figure 2. Warning signage locations.

#### 6.0 Water Takes

Identification of consented water takes is undertaken using the Regional Council's surface water take information (Figure 3). There is one consented water take proximate to the planned spraying within Lake Benmore:

 CA15/5027, Waitaki District, bore or well, community drinking water supply point: Sailors Cutting campground.

This is a water take at Sailors Cutting which is used for the water supply for the campground. Resource consent has been granted and the landowner has been contacted in advance of this spraying operation. The water take will be shut down for a period of 48 hours following the spraying event as per consent CRC213071 requirements. No other water takes are affected by this operation.

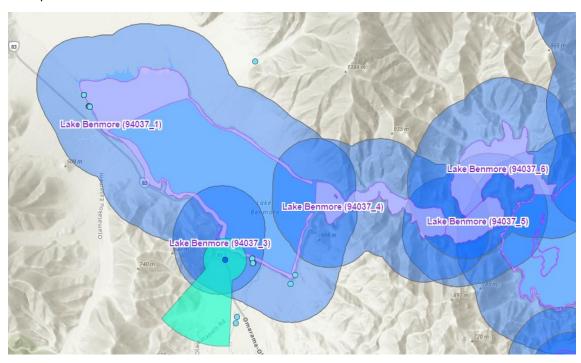

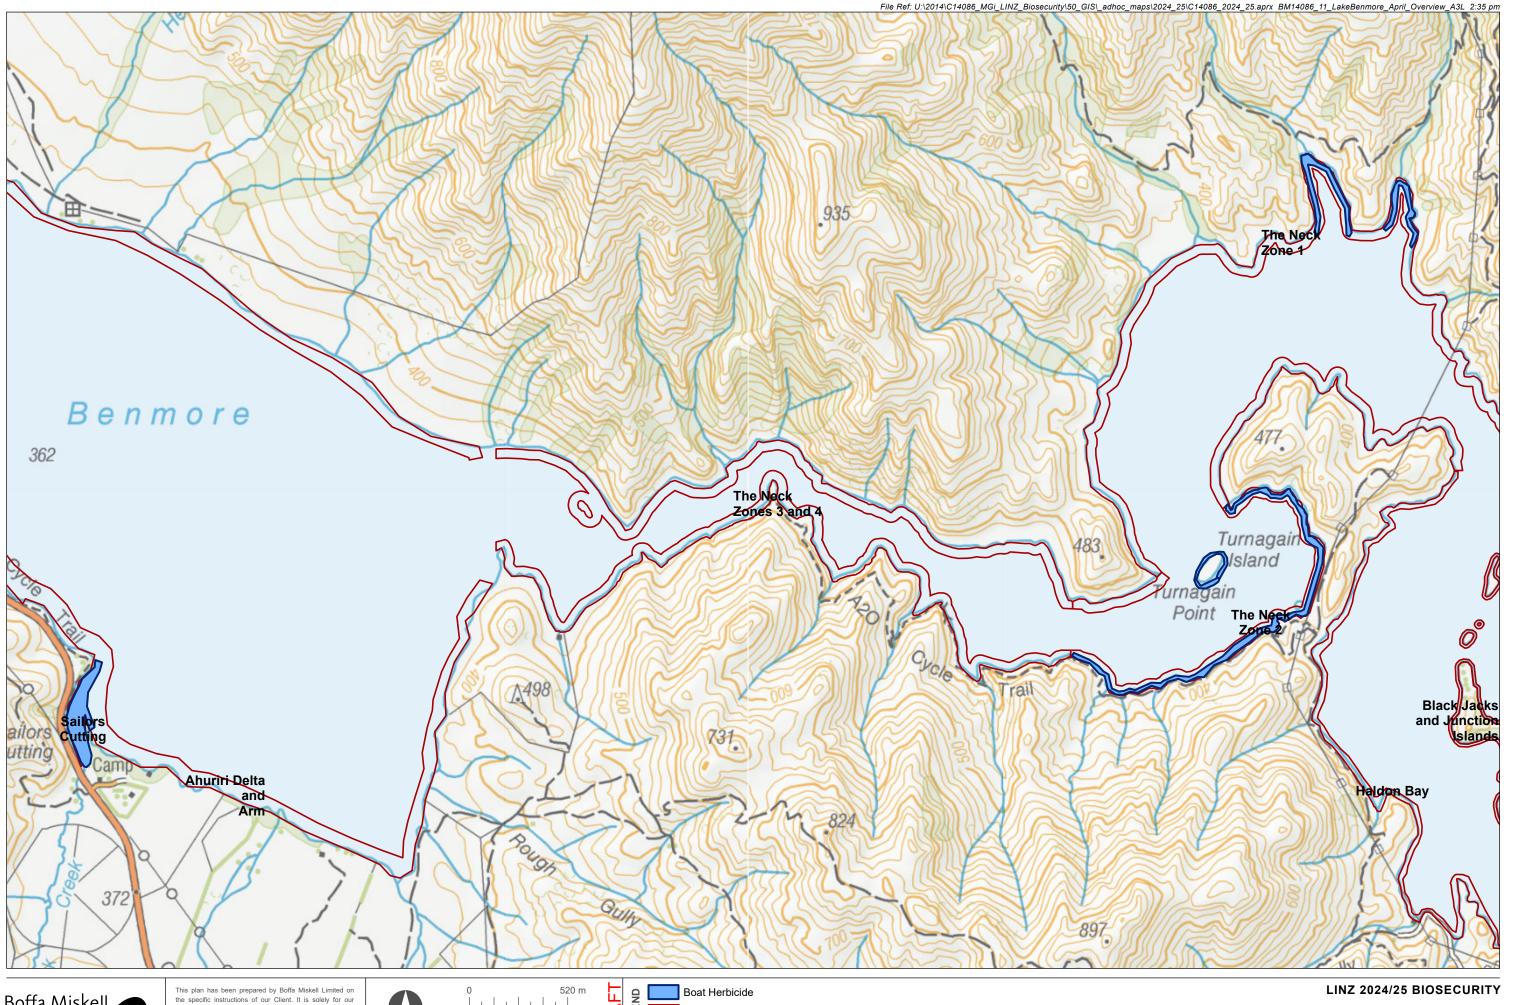

Figure 3. Consented water takes (point data) within the Sailors Cutting and Neck. The green area denotes the Community Drinking Water Protection Zone at Sailors Cutting.

## 7.0 Proposed Spray Areas

Approximately 20ha of boat-based spraying is proposed for Lake Benmore in April 2025. A map of the proposed herbicide treatment areas is shown below.

This plan has been prepared by Boffa Miskell Limited on the specific instructions of our Client. It is solely for our Client's use in accordance with the agreed scope of work. Any use or reliance by a third party is at that party's own risk. Where information has been supplied by the Client or obtained from other external sources, it has been assumed that it is accurate. No liability or responsibility is accepted by Boffa Miskell Limited for any errors or omissions to the extent that they arise from inaccurate information provided by the Client or any external source.
