

Chart No. NZ 615

STEPHENS PASSAGE
No vessel of 500 tonnes UMS gross or greater may transit Stephens Passage unless exempted by the Harbourmaster.
This area is extremely turbulent and liable to strong tide rips, eddies and overfalls. During the ebb tide stream (east going) turbulence occurs east of a line joining Cape Stephens and Stephens Island, while on the flood tide stream (west going) turbulence occurs west of the line.

Chart No. NZ 6151

STEPHENS PASSAGE
No vessel of 500 tonnes UMS gross or greater may transit Stephens Passage unless exempted by the Harbourmaster.
This area is extremely turbulent and liable to strong tide rips, eddies and overfalls. During the ebb tide stream (east going) turbulence occurs east of a line joining Cape Stephens and Stephens Island, while on the flood tide stream (west going) turbulence occurs west of the line.
