

3.27 Landonline Release

eSurvey release notes

Title	MOR2 – Closing Windows that Are Tiled Vertically or Horizontally in Capture Crashed Landonline
Defect	LOLCM-3370 (External)
Description	<p>If a user tiled a screen with the spatial window (e.g., Parcel List to perform linking of parcels), and then closed the Parcel List screen to go back to viewing just the spatial window, the following message would appear and Landonline would close upon selecting ok</p> 
Action	FIXED Users can now tile their spatial screens and close them without being thrown out of Landonline

Title	Attaching Coloured PDFs to all Landonline Request types - STEP
Enhancement	LOLCM-3307 (Internal & External)
Description	Titles and Survey, Workspace and Desktop Requests. Users now can attach colour documents.
Action	<p>Landonline already allowed the ability to attach PDF documents however these would be converted to B&W images. This enhancement allows the attachment of documents in colour. Images are converted to colour tiff images to allow them to be previewed. Once a PDF image is attached the following message will appear instructing the user to check the conversion.</p>  <p>Three new options in the request screen allow the user to decide on a B&W or greyscale format if the file size is too large for conversion to colour.</p>

Note: Documents when uploaded and converted to tiff can still be saved/downloaded as PDF documents.

- Menu > File > Save Works to save Tif or PDF - No Change to Current
- Right Click on the images allows to save as Tif / PDF / JPEG - No Change to current

Title	POST 3.24 RCS2021 issue - C640 rule not returning correct results
Enhancement	LOLCM-3303
Description	Connections to multiple CSNMs that are within 1000m of a new primary parcel boundary point as required by CSR 2021 r 17(1)(a) was still producing a C640 Warning in pre-validation.
Action	C640 is reporting as expected. Except for the known issue below. Known issue: If a CSD has got adopted boundary marks only and linked to a CSNM, at pre-validation the C640 will report a false warning.
