

Event description	Cost (excluding GST)	Breakdown of costs	Background
High Country Advisory Group meeting (2-day event in Queenstown on 21-22 November 2022)	\$12,807	Accommodation and Travel: \$8,958 Other e.g. equipment/reporting: \$3,849	<p>The High Country Advisory Group is an external advisory group that meets quarterly and enables a range of stakeholders, representing farming, environmental and iwi interests, to provide advice to LINZ and the Commissioner of Crown Lands on the management of Crown pastoral land in the South Island high country.</p> <p>This event was attended by 17 people (which included external board members and internal LINZ staff).</p>
Electronic Navigational Charts Standards Maintenance Working Group Meeting (ENCWG7) and project team meeting of the International Hydrography Organisation (IHO) new geospatial standard S-101 (Te Papa, Wellington, 21-25 November 2022)	\$21,623	Facilities hire: \$11,023 Catering: \$9,948 Other e.g. equipment/reporting: \$652	<p>As a member of the IHO there are obligations to host events and partner with the sector, so we are able to collaborate, draw on expertise, and have a mutually beneficial relationship when working toward a common goal.</p> <p>This IHO meeting resulted in deeper connections with international colleagues, a deeper technical understanding of the S101 standard for our LINZ people who do not normally attend international events, and progress on the development of the S101 Standard by the participants.</p> <p>By including a cultural event and a tour of the Te Papa exhibition 'The Horizon: Pacific navigation and voyaging' we were able to provide attendees from other countries a glimpse at NZ's early history on this topic.</p> <p>The event brought 30 delegates from around the globe to NZ to work on the development of the new global navigation standard for Charts S101.</p>

<p>20<sup>th</sup> South West Pacific Hydrography Commission (SWPHC) meeting and governance workshop (James Cook Hotel Wellington, 20-24 February 2023)</p>	<p>\$44,168</p>	<p>Accommodation: \$17,118.26 (reimbursed by the IHO Capability Fund) Facilities hire: \$23,341 Catering: \$3,708</p>	<p>The SWPHC (made up of 12 member states, 6 associate members and several observer organisations) meets annually to report on activities, promote cooperation and plan activities for the region.</p> <p>National Hydrographer, Adam Greenland, as Chair of the SWPHC, hosted this occurrence in Wellington.</p> <p>The event resulted in progressing the SWPHC work plan, capability building throughout the region, relationship building, awareness raising across a number of NZ Government departments (e.g. Maritime New Zealand, Ministry of Foreign Affairs and Trade, New Zealand Defence Force) and it was an opportunity for members of Hydro and the wider LINZ team to attend an international meeting of this nature.</p> <p>Approximately 60 people attended in-person, from across the South Pacific, Europe, and the United States.</p>
<p>High Country Advisory Group meeting (2-Day event in Christchurch on 27-28 March 2023)</p>	<p>\$15,082</p>	<p>Accommodation and Travel: \$4,106 Facilities hire: \$5,701 Catering: \$593 Other e.g. equipment/reporting: \$4,682</p>	<p>The High Country Advisory Group is an external advisory group that meets quarterly and enables a range of stakeholders, representing farming, environmental and iwi interests, to provide advice to LINZ and the Commissioner of Crown Lands on the management of Crown pastoral land in the South Island high country.</p> <p>This event was attended by 21 people (which included external board members and internal LINZ staff).</p>
<p>Marine Geospatial Hui – Tono Wananga (Wharewaka in Wellington on 30 April 2023)</p>	<p>\$23,054</p>	<p>Travel: \$9,192 Facilities hire: \$5,702 Facilitator: \$8,160</p>	<p>LINZ partnered with Te Arawhiti, Department of Conservation and Ministry for Primary Industries through the Digital Government Partnership fund (in 2020) for an Innovation project, enabling integrated marine management using marine spatial information.</p>

			<p>The funding was provided for 1) a technical proof of concept and 2) to develop a te ao Māori perspective relating to Marine spatial data.</p> <p>The Marine data hui brought together Māori marine specialists from around New Zealand to share insights and provide recommendations on how Crown agencies can empower Kaitiaki with improved access and reuse of marine data.</p> <p>The event resulted in a report outlining key recommendations and next steps which is being incorporated into our workplans.</p> <p>The in-person hui was held at the Wharewaka in Wellington and attended by approx. 30 people.</p> <p>An on-line session preceded for those unable to attend in person. 15 people attended the online session.</p> <p>Costs associated with planning and the production of the report have not been included.</p>
