

Release Notes for e-Dealing Users

Changes for lawyers and conveyancers as part of Landonline Release 3.23

Survey number field added to Fast-Track request

LOLCM-1872

The Fast-track request screen has been modified so both the dealing number and plan reference are required before the request can be submitted

Details

Fast-Track Automation – Fast track requests are now to only be raised by external eDealing users from workspace – these now have both the plan and dealing linked.

Fast-Track requests require the dealing and plan to have been submitted to LINZ to be accepted.

A change has been made to the Fast-Track request screen to add a mandatory 'survey number' field, this also shows the status of the plan number which has been entered. This ensures both the dealing and plan are with LINZ before the request can be sent.

Note: if multiple plans are included in a dealing then you will need to submit a separate request for each plan.

Request Detail

* Request Type Request for Fast-Track

* Dealing Number <None>

Client Reference 1

Client Reference 2

Title Reference

* Survey Number

Notes/Comments

* Survey Number LT 536113 Status Submitted

OCTN now able to handle larger ownership shares

LOLCM-2154

Larger share values can now be entered against owners from the prepare OCTN screen

Details

Currently, any owner's share longer than 8 characters is truncated in the OCTN Screen. This is inconsistent with other ownership share windows in Landonline. This has been increased so longer share values up to 50 characters can be entered.
