Subject: Submission on Occupational Regulation of Valuers

Submission From PA Curnow

I have been a registered valuer since 1977. This submission represents a personal view and largely coincides with the VRB submission that I was a party to preparing.

The only matter I wish to submit on is Question 4. In this respect I am comfortable with the position that it not be mandatory to join NZIV or any other professional association. A professional body that delivers benefits to registered valuers and as a result enables valuers to generate improved incomes will gain and /or retain members. This will have a twofold effect, as it will also improve the sustainability of the profession.

As for Q5, the issues resulting from voluntary membership could be adequately managed through the VRB. Thank you for the opportunity to submit.

Phillip Curnow.
