

Release notes for territorial authorities

Changes for territorial authorities as part of Landonline Release 3.11.

This release covers these issues and enhancements:

[Missing Foreign Key Error Attaching Images To TA Requests \(#foreign-key\)](#)

[TA Certification is Returning an Error on Signing \(#cert\)](#)

[New TA Certificate for Section 32\(2\)\(a\) Stage Plans \(#stage-plans\)](#)

[Update of Territorial Authority name from Lower Hutt City to Hutt City \(#lower-hutt\)](#)

Q Missing Foreign Key Error Attaching Images To TA Requests

After attaching an image to a TA request, two error messages occurred which prevented the images from being attached.

This has been fixed so that you can now create a TA request and attach one or more images to your request.

Q TA Certification is Returning an Error on Signing

If a Survey contained a 'Surveyor Reference', 'Survey Description' or 'TA Reference' with a character such as @, <, >, then when the TA attempts to sign, an error message would occur.

This has been fixed so that TA signing now works successfully even with previously troublesome characters.

Q New TA Certificate for Section 32(2)(a) Stage Plans

TA certification for staged unit plans was set up in such a way that a TA might miss the 'extra' certification that is required under s25(5) Unit Titles Act.

To fix this, TA certification now combines 32(2)(a) and 25(5) to be a combined TA certification for First, Subsequent Stage and Complete stage unit plans.

TA Certification 32(2)(a) still remains as a certification on its own.

32(2)(a)	32(2)(a)
32(2)(a) & 25(5)	32(2)(a) & 25(5) First, Subsequent Stage and Comp

Update of Territorial Authority name from Lower Hutt City to Hutt City

The label for the Lower Hutt City Territorial Authority District has been changed to reflect that of its administering authority i.e 'Hutt City'.

Hutt City now displays in the drop down options of Territorial Names in the TA Certification tab at Capture.
